**Tie Rope (a/k/a the Quick Release Hitch):**

Take a piece of rope and tie a figure eight on a bight on one end (1). Place the rope on the opposite side of the hose with the knot at the top (2). Make sure to stay off of the “brass”. Take a bight through the loop of the knot (3) and cinch it tight (4).

Create another bight (5) and pull it through the other bight (6). Pull the standing end to release it (7). Consider membership to International Guild of Knot Tyers (IGKT)...
