Nozzle Forward: What, Why, When, How. & "I Went To The Woods"

One thing that every fire department in the country has is fire hose. The one event that happens on every single fire is a hose-line gets pulled and water gets flowed. The Nozzle Forward is a class for engine company crews. It is not a collection of technique; it is an adaptable system of hose line management and fire attack. It is focused around fighting fire, interior offensive firefighting, aggressive firefighting, for which we will never apologize. Aggressive firefighting is not the problem, it is the solution.

21st Century Command, Being Combat Ready & DCFD Cherry Rd. LODD Overview

Presented at FDIC the last 5 years. A highly interactive class that looks at NIOSH's top contributing factors in fireground LODDs, and systematically breaks them down providing systems and processes for the incident commander and company officer. This class will focus on the incident commander & company officer relationship as it relates to command, control, risk assessment, on-scene communications and incident accountability. Whether you are a seasoned boss, new or inspiring officer, or just looking to enhance your department's operations, this class provides you with the tools needed to be successful.

Fire Instructors & Officers Association of New Hampshire

Presenter Bios

Aaron Fields is a firefighter for the City of Seattle and the OG of the Nozzle Forward. Between his dad, brother, and himself, there is nearly always a Fields member on watch somewhere in the 5th battalion. His aspiration has always been to ride on the back of Engine 28, allowing him to work in the neighborhood he grew up in (98118 shout-out). After time at 28's, Aaron moved to his dad's spot on Engine Company 13, Battalion 5 headquarters. He is known for his dislike of "the MAN", tendency to question authority, and zealous belief that good basics win. Aaron developed the skills shared in the Nozzle Forward in an unrelenting pursuit of all things engine. The skills are adapted from many sources, but reconstructed to be based around simple principles that maximize mechanical advantage. At

the request of folks who wanted to see how he was going about hand-line use the Nozzle Forward was born as a program and has been slap'in lines around since 2008. When all else fails, give 'em a West Coast Salute.....

Lawrence Schultz has 35 plus years experience as a firefighter and currently serves as the Assistant Chief of Operations with the City of Alexandria Virginia Fire Department. He is responsible for the day-to-day operations of the 300-person department, as well as the Training/Professional Development Center, and Special Operations.

Prior to that he spent 26 years with the Washington DC Fire Department, serving at every operational rank, spending his last four years as the Assistant Fire Chief of Operations. In this position he was responsible for the day-to-day operations of the 2200-person department.

Chief Schultz received an A.A. degree in Fire Science from Columbia Southern University, a graduate of the George Washington University Center for Excellence in Municipal Management Program

and is a graduate of the Naval Post Graduate School's Executive Leadership Program.
